

Annex 2

To the order of ECO-Spectrum LLC

Dated \_\_\_\_\_ №

## **Environmental policy of ECO-SPECTRUM LLC**

The principal goal of the environmental policy of ECO-SPECTRUM LLC in carrying out its production activities is to minimize the burden on the environment by reducing emissions (discharges) of pollutants into the environment and reducing the generation of production and consumption waste, as well as maintaining a favorable environment for present and future generations.

The production activities of the organization have types of impact on the environment: the formation and accumulation of production waste, as well as physical impact on the atmosphere.

Environmental policy is based on the Constitution of the Russian Federation, federal laws and other regulatory legal acts of the Russian Federation, international obligations of the Russian Federation in the field of environmental protection.

ECO-SPECTRUM LLC in its activities ensures compliance with the most promising requirements aimed at reducing the impact on the environment, has all the necessary mechanisms aimed at preventing environmental risks.

The main target indicators for the implementation of environmental policy for companies are:

- compliance with legal requirements, regulatory requirements regulating the Company's activities in the field of ecology;
- development and implementation of measures aimed at environmental protection;
- ensuring careful, efficient and rational consumption of natural resources in current and planned production activities;
- timely, open informing of employees, authorities and the public about the Company's activities in the field of environmental protection.

The principal directions of implementation of environmental policy are:

- compliance with the requirements and standards established by the environmental legislation of the Russian Federation and international legal acts in the field of environmental protection;

- expansion of international cooperation in the use of environmentally friendly and energy-efficient technologies and equipment;
- priority of taking measures to prevent harmful impacts on the natural environment over the implementation of measures to eliminate the environmental negative consequences of such impacts;
- carrying out measures to save energy and improve energy efficiency;
- ensuring environmentally safe management of production waste;
- reduce the percentage of technological waste;
- exclude excess and excess payments for the negative impact of ECO-SPECTRUM LLC on the environment;
- development and improvement of the environmental management system of ECO-SPECTRUM LLC;
- ensuring openness and accessibility of environmental information;
- improvement of the industrial environmental control system;
- involving personnel in activities aimed at ensuring environmental safety, environmental protection and rational use of natural resources;
- advanced training of staff responsible for ensuring the environmental safety of the enterprise;
- continuous improvement of the image of ECO-SPECTRUM LLC as an environmentally oriented company.

*The management of ECO-SPECTRUM LLC, adopting the environmental policy, undertakes to follow its provisions when carrying out production activities.*
